

You will need:

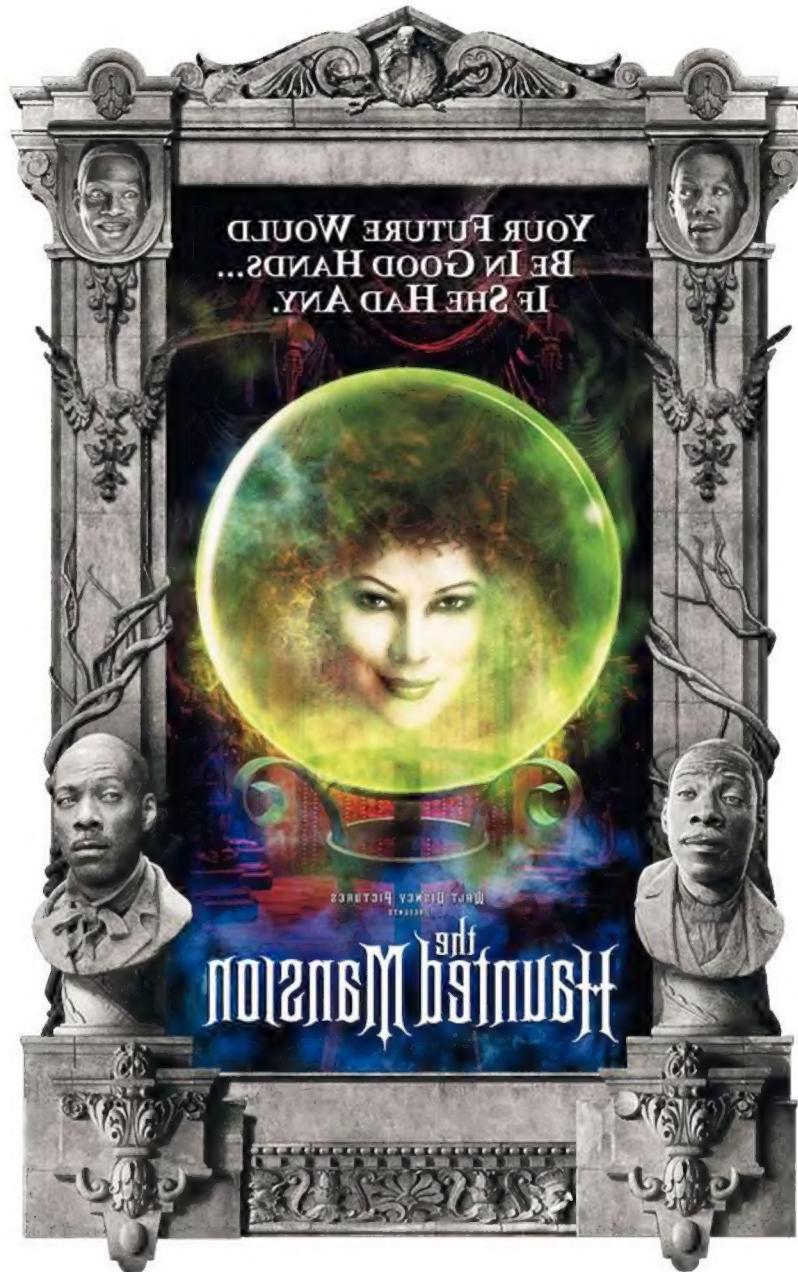

- Printout of image

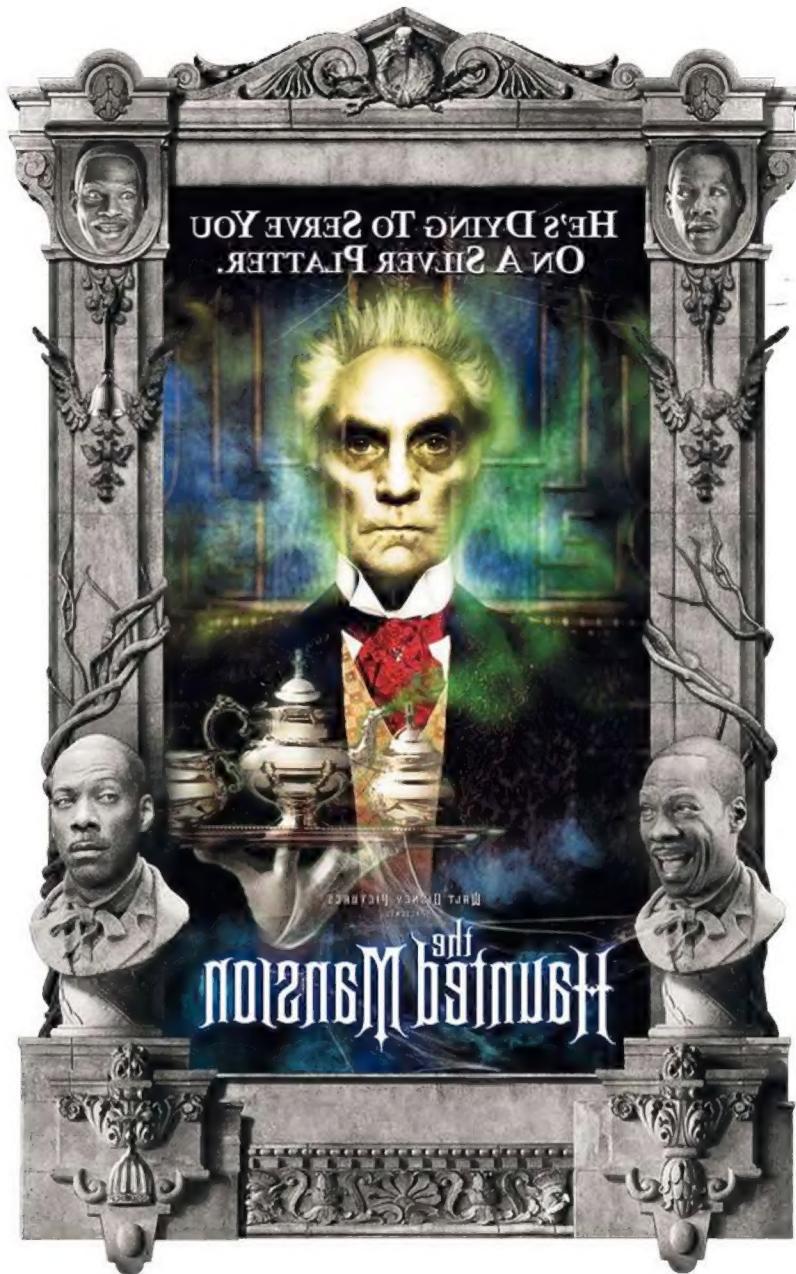

Instructions:

1. Fold page on fold lines.
2. Open and close folds to reveal or hide the pesky zombie.
3. If you want, you can write in the name of your favorite character on the slab below the casket.

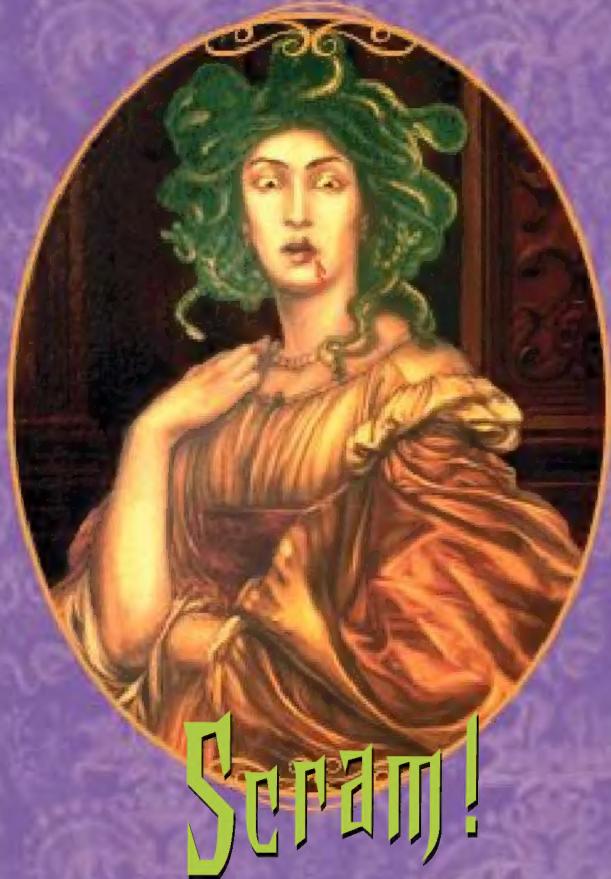

←
Cut out line, then
cut out hole.

(*note: it is best to
print this on thicker
paper or to glue this
sheet to another piece
of paper before cutting.)

←
Fold this in half to cut
the horizontal lines. It
makes a slit to cut the
vertical lines easier.

Cut this out all around the edges.

(*note: it is best to print this on thicker paper or to glue this sheet to another piece of paper before cutting.)

After you cut this out, tuck it into the slots on the door hanger's backing. Pull it up and down to show different messages!

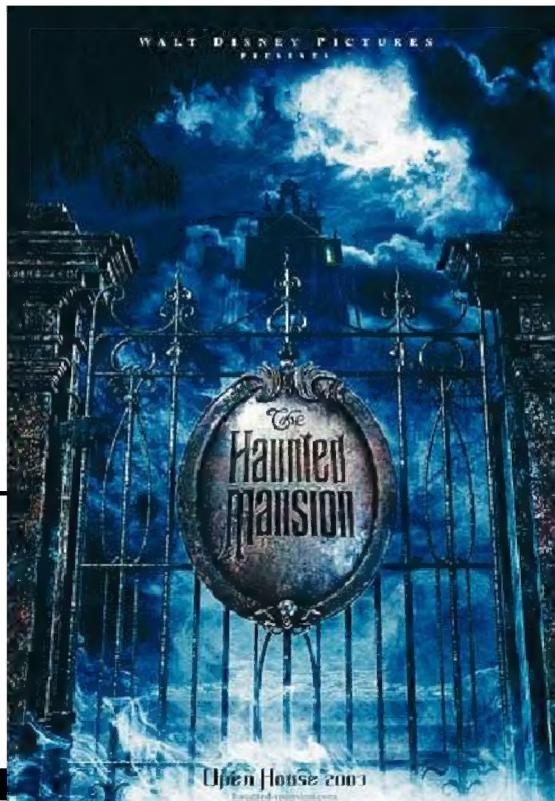

Zombie Door Hangers

Tools You'll Need

- 1 pair of scissors
- A piece of string, twine, or sisal at least 9 inches long

Making the Zombie Hanger

1. Print out the file on either a card stock that is safe for your printer, or glue your zombie image to another piece of paper.
2. Cut out the zombie hanger all around the edges.
3. Cut a small hole in the loop of the rope's noose.
4. Tie the piece of string through the noose hole and make a small knot.
5. Tie the other end of your string around your doorknob, and watch your zombie hang!

Hang on,
I'll be back!

Haunted Pumpkins Stencil

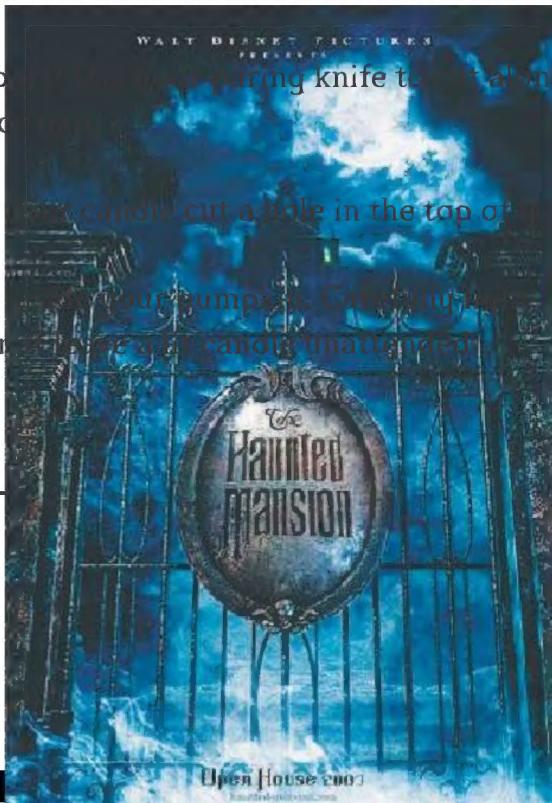

Pumpkin Carving Tools

For best results, any stencils are most easily carved with inexpensive pumpkin carving kits and are available many places such as your local grocery store. But you can also use the following common household tools:

- 1 large spoon
- 1 sharp serrated knife
- 1 pin or nail
- 1 paring knife

Carving Your Pumpkin

1. Start by spreading sheets of newspaper around the area you plan to work. This will reduce mess and make cleanup easy.
2. Print the stencil. Tape the stencil to your pumpkin. Using the nail or needle, punch holes through the paper, into the pumpkin, following the lines of the stencil.
3. Use the serrated knife to cut a circle out of either the top or the bottom of the pumpkin, depending on the look you want. Opening the top gives the traditional look with a convenient lid for the candle. Opening the bottom creates a flat surface to steady the pumpkin and keeps the top neat and uncut.
4. Scoop out the insides.
5. After the insides have been sufficiently scooped, use the large spoon the scrape sides of your pumpkin smooth. The sides should be about one inch thick.
6. This is the really fun part! Use your paring knife to start along the dotted lines you have made with the pin or needle.
7. To vent the heat from your candle, cut a hole in the top of your pumpkin.
8. Finally place a candle inside your pumpkin. Carving is complete - and watch your design come to life! Do not leave a lit candle unattended.

Haunted Pumpkins Stencil

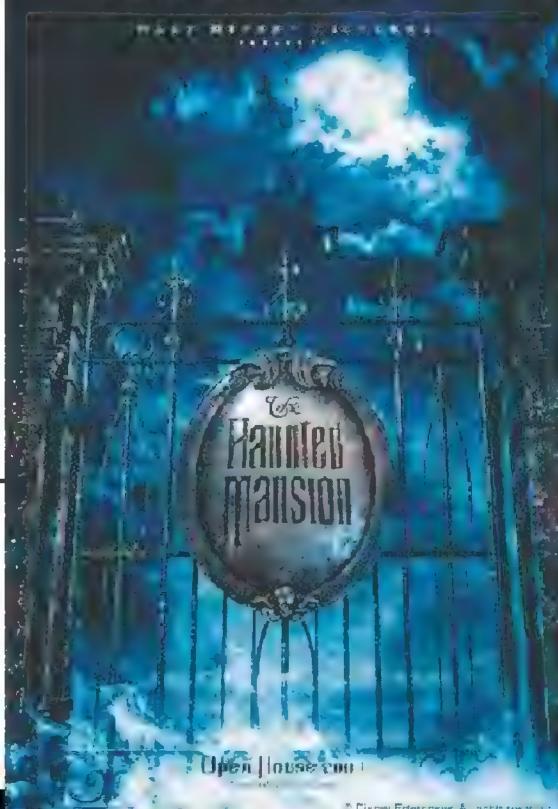

Roaming Eyes

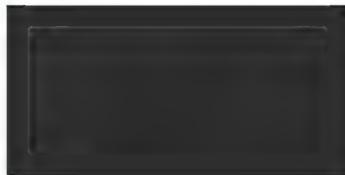

You will need:

- Printouts of portrait and eyes
- Scissors
- Tape
- Glue Stick

Instructions:

1. Carefully cut out the white area of both eyes.
2. Align the portrait sheet on top of the eyes sheet. Then tape together at top edge.
3. Flip back the portrait sheet.
4. Cut the eyes sheet as indicated.
5. Fold strips up matching "A" to "A" and "B" to "B." Tape at each top edge.
6. Put a little glue on the strips and bring the portrait sheet down on top.
7. Hang the portrait on the wall and walk by watching it. It will watch you too!
8. You might want to draw different expressions or make a different face on your own.

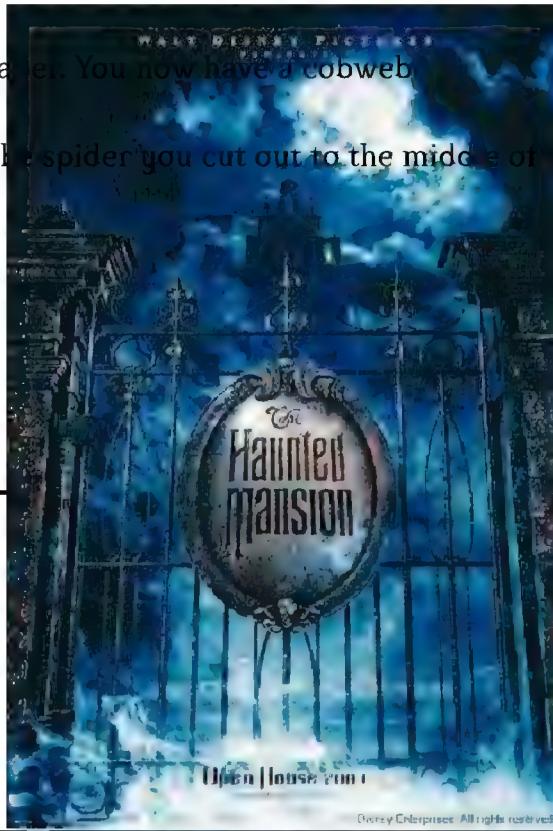

Cobweb Cutouts

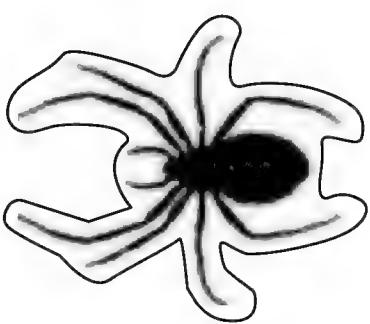

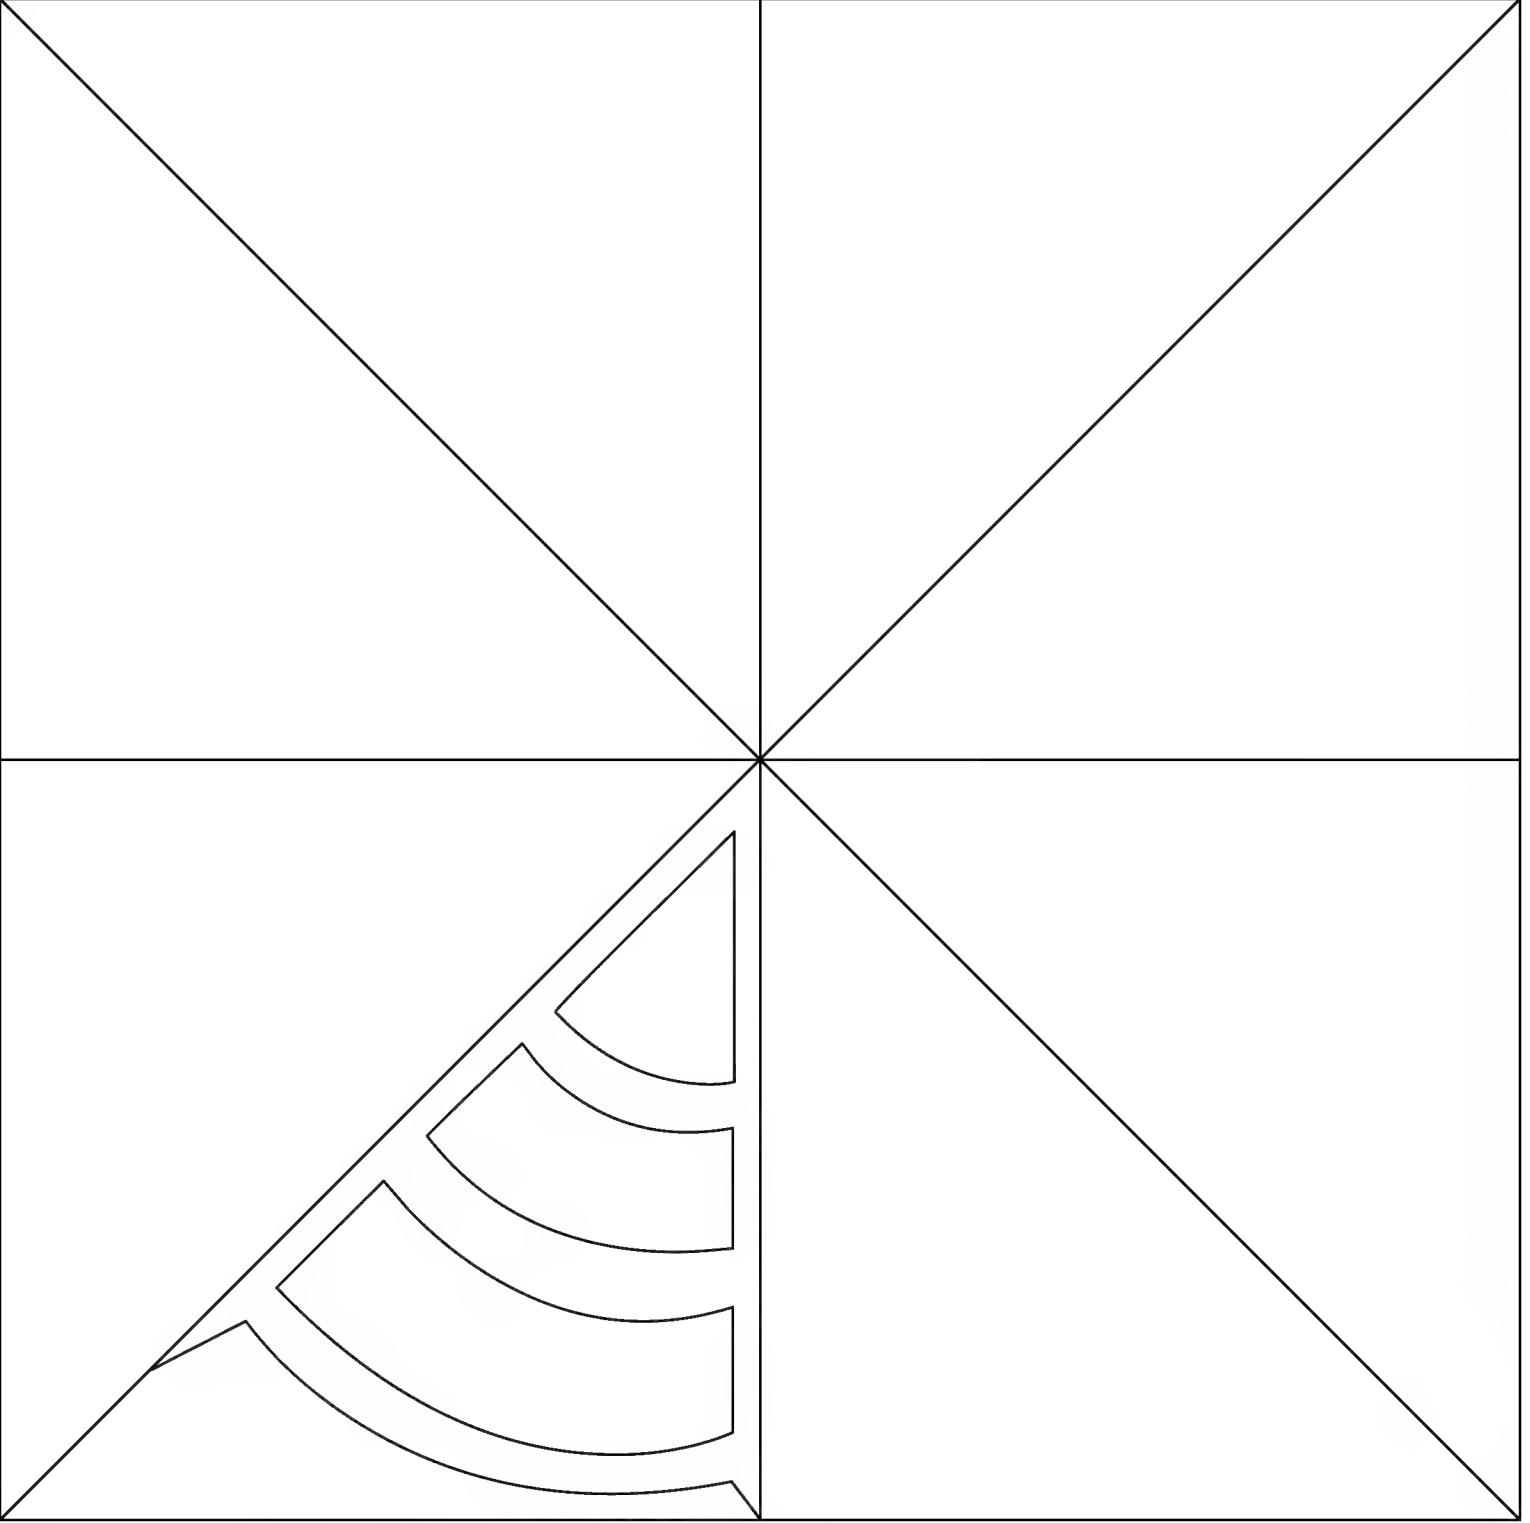

Cutout Tools

- 1 pair of scissors
- Either: a piece of tape, a gluestick, or tube of glue.

Making a Cobweb

1. Cut off the bottom strip of paper that has the spider on it. Follow the dotted line.
2. Following the dotted lines, cut out the spider and set it aside.
3. Taking the square of paper in your hands, first fold the paper diagonally, using the black lines as a guide. Fold the paper backwards so you can see the lines as you fold.
4. Fold the triangle in half.
5. Fold this smaller triangle in half again.
6. Using your scissors, cut out the pattern by cutting *only* along the dotted lines. You can fold the triangle in half again to cut out holes in the pattern for your scissors to fit.
7. Open up the folded paper. You now have a cobweb!
8. Finally, glue or tape the spider you cut out to the middle of the cobweb, and hang it up!

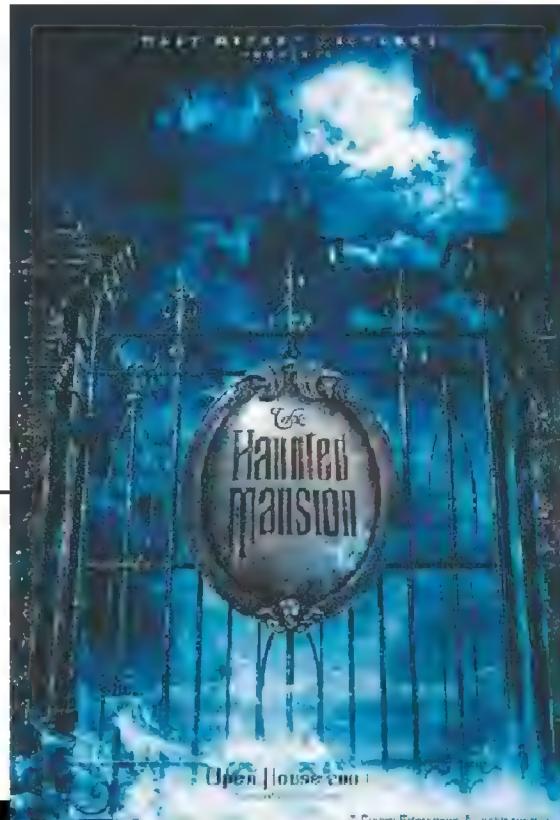

Haunted Mansion Ornament

You will need:

- Printout of ornament
- Scissors
- Glue stick
- Hole puncher
- String or narrow ribbon

Instructions:

1. Fold the printout in half along the line.
2. Glue the paper together.
3. Cut along the outline path of the ornament.
4. Use a hole puncher to punch out the black dot.
5. Tie the string or ribbon in a loop through the hole.

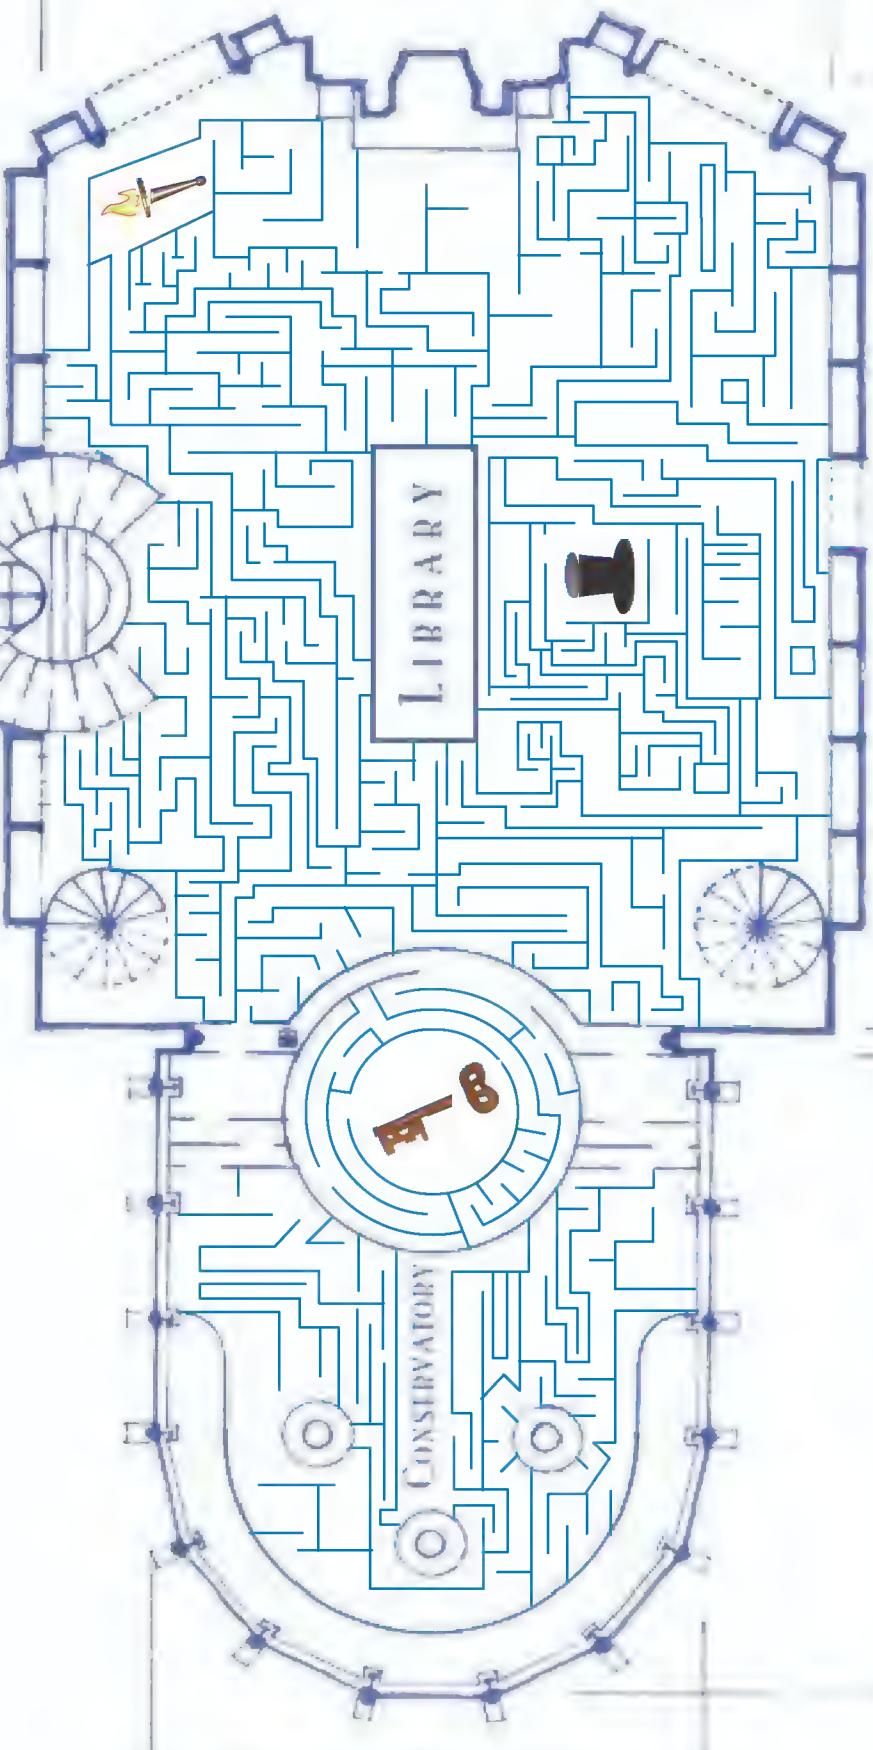

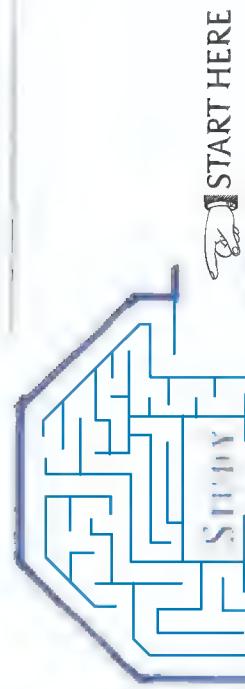

Haunted Mansion Ornament

Haunted Mansion Maze

You must first find the TORCH so you can see your way to find the HAT which will keep cobwebs out of your face so you can find the KEY to the Mausoleum.

Start in the study, but be careful. There are many twists, narrow passages and dead ends.

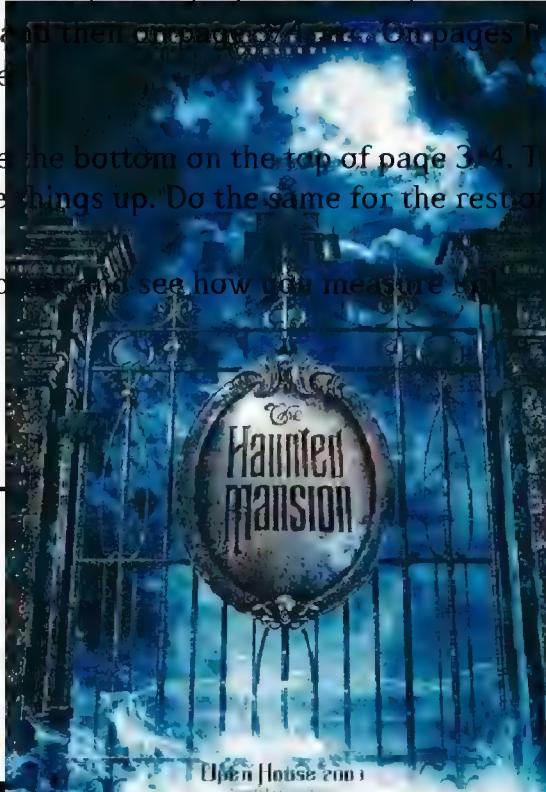

Ghost Height Chart

Tools You'll Need
- 1 pair of scissors
- Tape

Assembling the Height Chart

1. Print out all the pages in the document. There will be 19 pages total. Make sure you UNCHECK the "Scale to Fit" or "Shrink Oversized Pages to Paper Size" option on your printer settings!
2. Lay out your pages in order on the floor. The pages will be lined 2 across and 9 down, so:
1 and 2
3 and 4
5 and 6
etc.
3. On all even numbered pages (2, 4, 6, 8, 10, 12, 14, 16, and 18), cut off the left side of the page following the vertical dotted line.
4. Tape the left side of page 2 on page 1, using page 1's dotted line as a guide to tape the cut edge of page 2 against. The image should line up correctly.
5. Do the same for the next sets of pages. Tape page 4 on page 3, page 6 on page 5, etc.
6. Now cut off the top of each pair of pages following the dotted line. So, cut off the top dotted line on page 1/2, and then ~~the top dotted line on pages 3/4, 5/6, 7/8, 9/10, 11/12, 13/14, 15/16, and 17/18~~ on pages 3/4 and 18, cut along the "bottom floor line" as well.
7. Take page 1/2 and tape the bottom on the top of page 3/4. There will be a slight overlap of image to help you line things up. Do the same for the rest of the pages.
8. Hang up your height chart and see how tall you are!
